

Wishable

Sprint Presentation 1

Cindy Lam (cllam)

Ningna Wang (ningnaw)

Chidimma Onwuegbule (conwuegb)

Background

- Webapp for keeping wishlists
 - personal or public (registry)
- Add items by internal search or external link
- Get item data via web scraping
 - this data is editable for smarter results
- Any wishlist-item page pulls up similar items
- Catalog page shows items in database by popularity

Problems Encountered

Implementing our wireframes

- Templating the generic item listings
 - Tables are hard to work with
 - Our item listings designs aren't as similar as we thought.

Sprint 2 Goals

Sprint Backlog #2:

ID	Features	Detail Implementation	Team Member
2	add wishlist item	forms for item creation	Ningna
		UI for creating new item	Ningna
		create stub data for testing	Cindy
3	create wishlist	ui for creating wishlist	Chidimma
		forms for creating wishlist	Chidimma
		add items to wishlist	Chidimma
1	implement profile page	query for user wishlists & company stub data	Cindy

Q & A
